TASCHAI SRILAMPUNG

Application / Embedded Engineer (IoT & Maker)

📧 taschai.sr@gmail.com 📞 +66 62-703-3574 🌐 www.myryolife.tech 📍 Bangkok, Thailand

PROFESSIONAL SUMMARY

Hands-on R&D Technician with a strong "Maker" mindset, passionate about IoT, embedded systems, and robotics. Experienced in assembling hardware prototypes and troubleshooting hardware-software integrations using Raspberry Pi, ESP32, and Arduino. Capable of reading technical diagrams, testing embedded systems, and explaining technical concepts clearly. Seeking to grow technical skills as an Application Engineer or Embedded Systems Technician.

WORK EXPERIENCE

R&D Technician (Confidential Project) Nov 2025 – Present

Tiny Stack Co., Ltd. | Bangkok, Thailand

- **Prototype Assembly:** Hands-on assembly of Raspberry Pi units, researching GPIO pinouts, and wiring sensors based on component specifications.
- **System Setup:** Installed OS and configured software environments for testing purposes.
- **Testing & Support:** Conducted functional tests and assisted engineers in troubleshooting hardware-software integration issues.

Smartphone Repair Technician Mar 2025 – Present

Khumsup Mobile Repair Shop | Bangkok, Thailand

- **Hardware Specialist:** Performed component-level repairs including screen replacements, battery installations, and delicate soldering tasks.
- **Software Diagnostics:** Handled firmware flashing, bootloader recovery, and system restorations for various mobile devices.
- **Customer Support:** Explained technical problems and repair solutions to customers in clear, easy-to-understand language.

PROJECT EXPERIENCE

Autonomous Cleaning Robot (ROS2-based)

Personal Project

- Developed prototype autonomous robot leveraging ROS2; integrated distance sensors for navigation and obstacle avoidance.
- Configured ESP32 microcontrollers to interface with motors and sensors via Micro-ROS; gained hands-on Linux administration and debugging experience.

Equipment Management System

Senior Project | 2024

- Developed full-stack web application using React (Frontend) and Node.js (Backend); designed RESTful APIs and database schemas for inventory tracking.

TECHNICAL SKILLS

Embedded & IoT: Raspberry Pi, ESP32, Arduino, Sensor Integration

Programming: Python, C/C++, JavaScript, Node.js, React

Hardware Skills: Soldering, Hot-air Rework, Multimeter, Circuit Troubleshooting

Robotics: ROS2, Micro-ROS, SLAM concepts

System & Tools: Linux (Ubuntu/Mint), Git, CLI, VS Code

Communication: Technical Demonstration, Documentation, Explaining Tech to Beginners

EDUCATION

Chulalongkorn University 2020 – 2024

Bachelor of Science in Computer Science | GPA: 3.23

CERTIFICATIONS & ACTIVITIES

- AI Hackathon – Aiful (2024)
